

# Appendix

Cachena: Corey Sloan, Nihaal Sidhu, Keegan Hood

## Time Commitment:

- Corey Sloan
  - 18 hours spent in Team Meetings
  - 15 hours on research
  - 13 Environment testing
- Nihaal Sidhu
  - 15 hours spent in Team Meetings
  - 7 hours research
  - 10 hours documentation
  - 15 Environment/hardware exploration
- Keegan Hood
  - 18 hours spent in Team Meetings
  - 10 hours on research
  - 20 hours hardware exploration

## Evidence:

- As a team we met bi-weekly for 3 hours, Nihaal missed one meeting with the advisor so his hours are 15. Individually we each spent our own time researching key elements of the project, such as hardware and software, previous implementations/current products on market, and ethics. Nihaal spent 10 hours on documentation, doing all the class assignments. Then individually and in pairs we spent time working on mini projects, upskilling, and doing R&D.
